PUBLISHED BY THE AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
33 WEST 39TH STREET, NEW YORK 18, N. Y.

This pamphlet contains complete multientry indexes covering the contents of *ELECTRICAL ENGINEERING* for the calendar year 1948. It includes all special articles and authors, all news items, and all items published in *ELECTRICAL ENGINEERING* on AIEE technical program papers, whether they appear in the form of an abstract, digest, essential full text, or full text. The technical program papers are indexed also by both title and author.

With further reference to technical program papers, if a *Digest* appears, it will be listed as (Digest of TP48-000). An *Abstract* will be listed as (Abstract of TP48-000). If the essential full text or the full text appears, it will be listed simply as (TP48-000).

The contents are arranged as follows:

1. **General Subject Index.** Lists all general articles including "Letters to the Editor" and all items published on AIEE technical program papers, arranged alphabetically by multiple subject entries.

2. **General Author Index.** Lists all authors of material covered in the general subject index per item 1 above.

3. **AIEE News Index.** Lists all news items pertaining to Institute Activities.

4. **Non-AIEE News Index.** Lists all news items "Of Current Interest" not pertaining directly to Institute Activities.

5. **Biographical Index.** Lists all personal and obituary items on AIEE members.
